

Hessa6 Main Website — Documentation

Overview

The **Hessa6 Main Website** is an interactive digital platform designed to allow users and creators to **publish and explore cultural and creative content** in various formats.

It serves as a digital space for writers, artists, and creators to showcase their work — whether in the form of **articles, programs, archives, galleries, or music** — all organized within an elegant and user-friendly interface.

The platform aims to **connect audiences with creative works** while providing a structured and visually engaging experience.

Main Features

1. Articles (مقالات)

- Users can upload **articles** that include:
 - One or more **images** related to the topic.
 - A **detailed written article** with full content.
 - Display of the **author's name** and **publication date**.
- Each article has its own **detail page**, showing all associated media and text beautifully formatted.

2. Programs (برامج)

- Similar to the article section, but dedicated to **educational or informative programs**.
- Displays the **program title, author, and description**.
- Can include **images or videos** illustrating the program's content.

3. Galleries (معرض)

- A visually focused section showcasing **artistic exhibitions and image collections**.
- Users can upload multiple images under one gallery title.
- Each gallery has its own page presenting all related visuals in an elegant grid format.

4. Archives (الأرشيف)

- Dedicated to **video-based content** representing historical or cultural archives.
- Each archive item includes:
 - A **video player**.
 - The **title** and **description** of the archive.
- Videos are displayed in a **clean and immersive viewer page**.

5. Music (الموسيقى)

- Focused on **audio content**.
- Users can upload **sound clips or music tracks**.
- Displayed with a **simple and modern audio player** interface.
- Visitors can play audio directly from the page.

6. Podcast (بودكاست)

- Focused on **audio & Links content**.
- Users can upload **sound clips or music Youtube tracks**.
- Visitors can play audio directly from the Link.

7. Subcategory Pages (التصنيفات الفرعية)

- The website organizes posts under **subcategories** for easier browsing.
- Each subcategory has its own **details page** that shows:
 - The **subcategory name and type** (e.g., article, program, music).
 - All **posts** that belong to that subcategory.

8. Responsive Design

- Fully responsive and optimized for all devices.
- Ensures seamless navigation across **desktop, tablet, and mobile**.
- Adjusts layout dynamically for best readability and usability.

9. Navigation & User Experience

- Clear and simple navigation between main sections.

- Visually rich pages with clean typography and Arabic-friendly layouts.
- Each section (articles, archives, programs, etc.) is easily accessible from the homepage.

Purpose

The website was created to serve as a **digital cultural platform** where users can:

- Share their creative and intellectual work.
- Explore different forms of media — written, visual, and auditory.
- Discover and connect with other creators.
- Celebrate creativity across articles, archives, music, and art.

It's not just a publication website — it's a **creative hub** for culture, education, and art.

Admin Panel

The **Hessa6 Admin Panel** is a management interface built to help administrators easily handle all website content.

It allows admins to **create, edit, and delete** posts, categories, and users efficiently.

With a professional design, responsive layout, and secure login, it ensures smooth content management across all sections of the website.
